Contents

1. Scope and overview.....

2. Test Approach

3. Test Levels

4. Test Types.....

5. Roles and Responsibilities

6. Environment requirements

7. Testing tools

8. Industry standards to follow.....

9. Test deliverables.....

10. Testing metrics

11. Risk and mitigation

12. Reporting tool.....

13 Test summary

1. Scope and overview:

Testing the Tamalak Real Estate Application - a web-based platform that enables users to buy, rent, and sell properties. The platform supports multiple user roles including regular users, developers, agents, and administrators. Testing approach follows Agile methodology with automated testing using Katalon Studio v10.4.3.

2. Test Approach:

- Test levels: System Testing, Integration Testing
- Test types: Functional Testing, UI Testing, API Testing, Security Testing
- Environment Requirements:

Hardware:

Standard PC/Laptop with minimum 8GB RAM

Software:

Operating System: Windows

Browsers: Chrome, Firefox, Edge

Katalon Studio v10.4.3

Web Application: Tamalak Real Estate Application (test environment)

3. Test Levels:

- Smoke Testing - Quick validation of critical functionality
- Complete Testing - Comprehensive functional testing
- System Testing - End-to-end workflow validation

4. Test Types:

- Functional Testing - All 9 modules
- UI Testing - User interface validation
- API Testing - Backend service validation
- Security Testing - Authentication and authorization

5. Roles and Responsibilities

Name	Student ID	Role & Responsibility
Ahmed ElSherif Salah Elabd	235355	Authentication module testing,
Youssef Ahmed Afifi	233699	Developer Properties testing, Authentication
Noureldin Tarek	235223	Property Service testing, Navigation
Ahmed Ossama Sayed	232223	Admin module testing
Ahmed Amr El- Darawi	230713	Agent, Profile testing
Youssef Mohamed Khalaf	232899	Profile, Navigation, review testing

6. Environment requirements:

Hardware:

Standard PC/Laptop with minimum 8GB RAM

Software:

Operating System: Windows

Browsers: Chrome, Firefox, Edge

Katalon Studio v10.4.3

Web Application: Tamalak Real Estate Application (test environment)

7. Testing tools:

Tool	Purpose
Katalon Studio v10.4.3	Test automation and execution
JUnit	Test reporting framework
Git	Version control

8. Industry standards to follow:

- IEEE 829 - Test Documentation Standard
- ISTQB Testing Guidelines
- Agile Testing Best Practices

9. Test deliverables:

- Test Strategy Document
- Test Plan Document
- Test Scenarios (43 scenarios)
- Test Cases (142 automated test cases)
- Test Execution Reports (Smoke and Complete)
- Defect Reports
- Test Summary Report

10. Testing metrics:

Metric	Value
Total Test Cases	142
Test Cases Executed	142 (100%)
Pass Rate	84.51%

Defects Found	22
Defect Density (per day)	5.5

11. Risk and mitigation

S.No	Risk	Mitigation Plan	Impact
1	Environment instability	Maintain stable test environment	High
2	Test data corruption	Regular data backup and refresh	Medium
3	Automation script failures	Regular script maintenance	Medium
4	Critical defects blocking release	Prioritize critical bug fixes	High

12. Reporting tool:

JIRA will be the reporting tool for this project.

13 Test summary:

Metric	Value
Test Cases Planned	142
Test Cases Executed	142 (100%)
Test Cases Passed	120 (84.51%)

Test Cases Failed	22 (15.49%)
Critical Defects	1
High Priority Defects	9
